FOCUS CONSULTING PROJECT

Works to Rear Elevation - Hove

Client:
Ellmans

Project Summary:
Conducted a drone survey and detailed inspections to assess water ingress and structural issues affecting the building. The ongoing project involves addressing defects such as failing cavity trays, concrete deterioration, and inadequate drainage. Our recommendations include structural repairs, fireproofing, and insulation improvements to enhance the building's longevity and performance.

Services:
BSR Application, Principal Designer Building Regulations, Principal Designer CDM

Project Value:
c 40,000

Date:
2023-ongoing
